What are Axies?

- Axies are digital creatures created in an NFT format.
- Players can trade the tokens that hold the axies and aim to “collect them all”.
- There are many different kinds of axies available, and more than 500 different kinds of body parts.
 - Each Axie has 6 body parts, and each different kind of body part has different battle moves.
 - This results in many distinct combinations of axies with different kinds of abilities.
- Axies can battle with one another to win experience points used to level up the axie or evolve their body parts.
- Owners can also opt to breed axies to either keep themselves or sell on the Axie marketplace.

Gameplay

- Axie Infinity's battle system follows a turn-based card game system.
- Players take turns playing cards (actions) where the goal is to defeat the enemy team's Axies.
- The body parts that an Axie has determines which cards (abilities) they can use in a battle.
- In order to partake in a battle, one must have a full team of Axies to battle with (3 Axies).

Rewards

- Axie Infinity not only rewards players with enjoyable experiences through engaging gameplay, but also provides economic incentives in their “play to earn” gaming model.
- Thousands of players around the world are earning new streams of revenue through the participation in the Axie ecosystem by:
 - Competing in battles against players to earn prizes
 - Breeding Axies and selling the newly minted tokens on the Axie marketplace
 - Buying and reselling rare/high quality Axies
 - Farming for items needed to breed new Axies and then selling them on exchanges/marketplaces
 - Earning the AXS token ingame by completing quests
